ONE TO ONE PROGRAM

Kingsway Christian College has developed and delivered a range of strategies to contribute to the implementation of the College's One-to-One program.

STUDENT DEVICE GUIDANCE

Families are asked to purchase a device for their child in Year 6 – 12 which allows students to develop skills, work habits, attitudes and expertise that will prepare them for success and help them to become efficient and effective life-long learners.

To simplify the decision-making process, Kingsway Christian College has engaged with JB Hi-Fi Solutions (JBS) for Education for the supply and service of selected BYOD devices which meet the needs of our students. Ordering through the portal is a simple process.

HOW TO ACCESS THE EDUCATION PORTAL

qrco.de/JBBYOD

➢ Use the QR code above, or
➢ visit **jbeducation.com.au/byod** and enter the code ***KCCBYOD24***

You will then be able to choose your pickup or delivery option, device, accessories (e.g. bags or covers) and warranty.

Choosing to order through our portal means you have access to exclusive commercial grade warranty and pricing offerings, traditionally not made available to consumers when purchasing in-store. It also means the I.T. team at Kingsway Christian College can assist you with warranty claims and device replacement.

While a Microsoft Surface Go is an entry level tablet device suitable for use in Year 6, we strongly advise that they transition to a laptop such as the Microsoft Surface Pro for subsequent Years.

If choosing to purchase a device outside of the JB Education Portal, please ensure you follow the below recommendations. Also note that purchasing outside of the portal will mean you have access to less comprehensive warranty and replacement options.

NOTE REGARDING APPLE DEVICES

Macbooks can be purchased for your student, however this may come with limitations on what they will need through their schooling journey. Teachers may expect some standard software to be used in a classroom which may not be available to your student. For example, Microsoft Publisher and Visio are not available on MacOS. iPads are even more likely to come across software that is not available. We are also able to offer rapid setup, software installation and configuration options to students who purchase Windows devices. This same functionality is not possible to carry out on Apple devices.

DO NOT BUY:

- Laptops running Windows 10**S** (Safe mode)
- Laptops with 128GB or less of hard disk space (storage)
- Laptops with less than 8GB of RAM (memory)
- Chromebook, of any kind (as you cannot install programs needed for school)
- iPad's
